

Ramanujans Lost Notebook: Part IV

By George E. Andrews

Springer-Verlag New York Inc. Hardcover. Condition: New. 439 pages. Dimensions: 9.1in. x 6.4in. x 1.3in. In the spring of 1976, George Andrews of Pennsylvania State University visited the library at Trinity College, Cambridge, to examine the papers of the late G. N. Watson. Among these papers, Andrews discovered a sheaf of 138 pages in the handwriting of Srinivasa Ramanujan. This manuscript was soon designated, Ramanujans lost notebook. Its discovery has frequently been deemed the mathematical equivalent of finding Beethovens tenth symphony. This volume is the fourth of five volumes that the authors plan to write on Ramanujans lost notebook. In contrast to the first three books on Ramanujans Lost Notebook, the fourth book does not focus on q-series. Most of the entries examined in this volume fall under the purviews of number theory and classical analysis. Several incomplete manuscripts of Ramanujan published by Narosa with the lost notebook are discussed. Three of the partial manuscripts are on diophantine approximation, and others are in classical Fourier analysis and prime number theory. Most of the entries in number theory fall under the umbrella of classical analytic number theory. Perhaps the most intriguing entries are connected with the classical, unsolved circle and divisor problems. Review from the second volume: Fans...
