AUTHORHOUSE, United States, 2012. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.The book is designed to help children learn and understand the concepts of a computer. It gives them step by step instructions and leads them through the process on how to do something. The book also provides screenshots so the child can also use visual associations with the words that he/she is reading. They also have some exercises in the book that they can do to help them remember what was taught to them. Children learn at an early age and soak up the knowledge. It is best to give them as much information, and to display that information, in as many ways as possible. By the time your child reads this book, they will have a very good basic, but yet strong foundation of the Microsoft Windows operating system. The book is meant for anyone, not only children, to be able to pick it up, read it, and understand it from a non-technical standpoint. Please look towards the back of the book to contact the author for any pre-sales questions or comments.
