Reviews

This pdf might be well worth a study, and a lot better than other. It really is simplistic but excitement inside the fifty percent in the book. Its been printed in an exceedingly straightforward way which is just after i finished reading this ebook through which really modified me, modify the way i believe.

Forgotten Books. Paperback. Condition: New. This item is printed on demand. 54 pages. Dimensions: 9.0in. x 6.0in. x 0.1in. Excerpt from Autogenous Welding of Metals, 1908: Tr, From Reports of the National School of Arts and Trades of France. The so-called oxyacetylene welding of metals consists in the assembling, by means of more or less complete melting of metallic pieces of the same nature, the surfaces of which are brought in contact at a high temperature, without interposition of a different metal from that constituting the pieces. By extension, the name oxyacetylene has been applied to welding made between pieces of different metals which can, however, form a resisting alloy. On the other hand, the interposition of another neutral metal capable of forming a more or less perfect assembling between the two similar or different metals in presence constitutes a brazing, and tin soldering is among that class. The melting points of the various metals being very different, the oxyacetylene welding of a certain number of metals (lead, for instance) has been easily accomplished for a number of years, while its application to iron, steel, brass, etc. has been more difficult and required entirely different processes. We shall consider these latter processes only, and if we were to refer to the definition of oxyacetylene welding we would have to establish the following classification: Welding with a blacksmiths forge. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com. This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy.
